Mohammad Numan Nadaf

Bengaluru, Karnataka, India | numan.nadaf06@gmail.com | linkedin.com/in/numan-nadaf | github.com/numan-nadaf

Summary

Motivated Computer Science Engineering student and certified full-stack developer with practical experience in React.js, JavaScript, Python, and REST API integration. Proven ability in software testing, debugging, and QA documentation through industry internship. Skilled in evaluating AI model outputs for accuracy, coherence, and reasoning quality. Seeking remote AI Evaluation, Software QA, or Full-Stack Development roles with companies such as Outlier AI, Scale AI, Mindrift, and Toloka.

Technical Skills

Programming: Python, JavaScript (ES6+), HTML5, CSS3

Frameworks & Tools: React.js, Node.js (basic), Git, GitHub, Postman, VS Code, REST APIs

Testing & QA: Functional Testing, Test Case Design, Debugging, Bug Documentation, Software QA

AI Evaluation: Model Output Assessment, Prompt Analysis, Structured Rubric Design, Data Annotation

Concepts: Agile Development, REST API Integration, Responsive Design, Basic CI/CD

Soft Skills: Technical Writing, Analytical Problem Solving, Attention to Detail, English (B2)

Experience

Web Development Intern 2024

Arlig Technologies *Bengaluru, Karnataka, India*

- Developed and maintained web application modules using React.js and JavaScript, contributing to multiple production features.
- Executed functional testing and debugging across software modules, authoring detailed bug reports that accelerated QA resolution cycles.
- Integrated RESTful APIs into frontend components, enabling dynamic data rendering and improving application responsiveness.
- Designed and maintained structured test case documentation, strengthening team QA workflows within an Agile development environment.

Projects

Full-Stack Web Application | *React.js, JavaScript, REST API, CSS3* 2024

- Architected a full-stack web application with reusable React.js component architecture, reducing code duplication by 30%.
- Integrated third-party REST APIs for real-time dynamic data rendering; debugged performance bottlenecks to improve load speed.

Responsive UI Component Library | *React.js, HTML5, CSS3* 2024

- Built a cross-browser-compatible UI component library with accessibility compliance and responsive design best practices.
- Conducted systematic functional testing across browsers and devices, ensuring consistent rendering and zero regression defects.

AI Output Evaluation System | *Python, Prompt Engineering, Structured QA* 2024

- Designed structured evaluation rubrics to assess AI-generated outputs for factual accuracy, logical coherence, and response safety.
- Automated test data preparation and model output comparison using Python scripts, cutting manual evaluation effort significantly.

Education

Bachelor of Engineering, Computer Science Expected 2026

Bengaluru, Karnataka, India

Certifications

Web Development Certification — Full-stack program covering HTML5, CSS3, JavaScript, and modern frameworks.

React JS Certification — Covers hooks, state management, component lifecycle, and REST API integration.
